HOVMSD FOG Control Program Update August 2015

Project Overview

A total of five sites have not yet installed their grease traps. We are working with every remaining business in ensuring that they have their traps installed by their revised installation dates.

Overview by Community

Darboy Sanitary District: All of the sites that were required to have grease traps have had them installed. A total of ten sites required reminders and four are scheduled for compliance site visits.

Village of Combined Locks: All sites requiring grease traps are now compliant. No reminder letters need to be sent and one site visit is required.

Village of Kimberly: One site has not completed their grease trap installation. At this time we are working with the responsible party to expedite their grease trap installation. Three sites require reminder letters and three require site visits.

Village of Little Chute: One site has not completed their grease trap installation. Seven reminder letters are needed. No site visits are scheduled.

City of Kaukauna: Three sites have not completed their grease trap installations. A total of five sites require reminder letters and six sites require site visits.
