

February 4, 2016

Mr. Glen Guerts  
District Director  
Heart of the Valley MSD  
801 Thilmany Rd.  
Kaukauna, WI 54130

Dear Mr. Guerts:

**Congratulations! The Heart of the Valley Metropolitan Sewerage District has been selected to receive free technical assistance from the Commission as part of its formally adopted 2016 Work Program and Budget.** As you may recall, the Commission solicited project proposals in the latter part of 2015 for consideration in 2016. These proposals were evaluated by staff and the Commission's Steering Committee based on a number of criteria and guidelines. The recommended list of projects was then approved at the January 29, 2016 Quarterly Commission Meeting.

A total of 32 new projects were selected under this program for some level of assistance during 2016. The complete listing of projects will be published in our upcoming Winter Newsletter or can be obtained by contacting our offices.

Specifically, your request for assistance with **Interceptor Sewer Manhole Location Mapping** will be addressed by the Commission during 2016. This project will be led by Commission staff member Mike Zuege who will be contacting you shortly to discuss further details about the project as well as the timing of its initiation and completion during the calendar year.

The Commission is pleased to provide this ongoing service as a benefit of your County's membership in our organization. We look forward to working with you and please do share your opinions about East Central's services with others in your community!

Sincerely,

Eric W. Fowle, AICP  
Executive Director

c: Mike Zuege, ECWRPC
