Hi Glen,

Thank you for returning my phone call today. As I mentioned in our phone call, we produce natural cheese. We are located in Hollandtown. We are in the process of researching future treatment options for treating our waste water. We are interested in seeing if sending our waste water to the HOTV Metropolitan Sewage District is an option we can consider. As you requested here is the volume and strength numbers.

Flow: Average – 240,000 gal/day (Peak – 300,000 gal/day)  
BOD: Average – 1221 mg/l  
TSS: Average – 264 mg/l  
Phosphorus: Average – 23 mg/l  
Ammonia: Average – 6.8 mg/l

We look forward to hearing back from you regarding the Commissions interest.

Med venlig hilsen / Best regards

**Jason Mathis**
