Glen:

I could not agree more. There are long range implications here that should be thought through before committing rate payer dollars.

Please relay this to Greg. Good weekend to all!

Regards, DJC

Glen,

Thanks for checking. I don't want you folks to ask your board to decide on a commitment without project design info. I will relay this to Ken and tell him it is better to wait to see about HOVMSD commitments after a preliminary project design has been completed. There will be a number of "to be determined" factors in the preliminary budget numbers. I think Ken will understand this "to be determined" input as well as the others. There is a progression to these things that we should not ignore just because of a recently compressed time frame.

Thanks,

Greg

Greg,

I asked Commissioner Dave Casper to provide you with a suggested funding commitment level for The FGD project. He replied as you can see below. The Commission will be meeting for a special meeting on June 28th. I will attempt to put this item on the agenda for discussion.

If you wish to discuss general terms, contact Dave Casper directly, or contact me.

Glen

Reply: This needs to come from the commission, not me alone. We will have to discuss and vote on it. Please contact Greg to let him know this

Dave,

Greg Olson has asked that the HOVMSD provide him with the amount of financial support the District may be willing to contribute toward funding the FGD study. This would not constitute a firm commitment, but rather be used when EPRI is approaching other potential funding sources to show potential commitments.

I am not comfortable with making a commitment.

Would you be willing to provide Greg a number the District may be able to offer in terms of financial support?

He indicated a letter or email would be acceptable, sent to his attention, and that he would like a response as soon as possible.

Thank you.

Glen
