## HOVMSD FOG Control Program Update July 2016

### **Project Overview**

**Grease Trap Installation Update:** As the July deadline to install their grease trap's passed, only one site (K-Town Bar) completed their installation. The remaining five sites are in various stages of the grease trap installation process. The goal is to have all the traps installed by the end of August. A more detailed summary of the six sites is included under their Community location header.

### **Overview by Community**

**Darboy Sanitary District:** There are no reminder letters to send and 5 sites will require site visits.

**Village of Combined Locks:** There are no reminder letters to send and 2 sites will require site visits.

**Village of Kimberly:** There are no reminder letters to send and 1 site will require a site visit. We are having a difficult time performing our site visit at Hitters Bar because they do not answer the door outside of business hours and have not answered our phone calls or correspondence.

**Village of Little Chute:** In June, we agreed to extend the deadline for Gentleman Jacks to Mid-August because the new owners were not informed of the requirements of the FOG Control Program. We have talked to the new owners several times in July and they are still aiming for that deadline. The Heiting Place should have the trap installed in late July or early August, but we have not been given notice that the installation is complete. We will have a more complete update by the August 9, Commission meeting. There are no reminder letters to send and 8 site visits are required.

**City of Kaukauna:** Benchwarmers (formerly ET's Dog Pound) had asked for a late July/early August deadline and has not completed the trap installation. Hillstreet Bar and Journey's Bar are working towards mid-August deadlines. We will have a more complete update at the August Commission meeting. A total of 4 reminder letters will be sent and 5 sites will require site visits.
