I did contact Jeremy to introduce myself shortly after I started at HOV. I will follow up with him again after meeting with Jessica.

Thanks Brian:

Have you spoken with Jeremy Freund at Outagamie County Land Conservation about their role in design specs and construction? It was my impression they were going to handle a lot of the design details.

He can be contacted at: Jeremy Freund, PE, Project Coordinator (920) 832-5076 jeremy.freund@outagamie.org

Dave:

I am meeting with Jessica this afternoon to both meet her and to make the requested changes and update the wetland proposal for Keith Marquardt of DNR. I've not moved forward any further as formal DNR approval will prompt me to action. I'm thinking Jessica will be able to shed additional light with project details later today. I did speak with

Donohue prior to the last commission meeting about assistance with front end specs, on a T&M basis, for the bidding and pond construction. As expected, they would be delighted to assist us

There is no news on the gypsum project just yet. Myself, Kevin, and Chad will be sitting down with Greg Olson at 9AM on 4/12/17 to get an update and to hear about their plans for 2017. Perhaps they will be ready to make a move this spring but he didn't give me any indication on the phone that something big was imminent.

Good Moring Brian:

Could you please give a brief update on the progress (or lack thereof) in the planning/funding of the SGD project and the wetland project?
