Subject: Interceptor Discussion Points

Commissioners:

In order to keep the ball rolling on the Interceptor Action Plan, I plan to have it on the agenda, along with SMS, for the next Commission meeting. I'd like to be able to forward Scott important items that need further time and discussion as we continue the vetting process on the two interceptor alternatives. The purpose of this message is to inquire about the items that you feel you need further explanation in order to fully understand and evaluate both interceptor route alternatives. If you could take a few minutes and respond with the top 3 or 4 items that come to mind, I can pull the concerns together and discuss them with Scott prior to the next meeting. Ideally we can research and address these outstanding items and then move on with the study and selection process.

SMS and HOVMSD are currently exchanging data and information on our budget, annual debt service payments, community loadings and flows to address the impacts of the route selected on the HOVMSD rate structure and what the effects will be to member communities. This was a clear take away from the Community meeting as they want to know up front the cost and effects on a typical residential customer.

We will likely have a full agenda and limited time so I'd propose we discuss and schedule a standalone meeting for later this month dedicated solely to the Interceptor Action Plan.

Thank you.
