

Operations Update

Plant Operations – Plant operations and treatment were good for the month of August. No credits were used from the treatment basin.

Bio-Solids Hauling – Due to the rain, there hasn't been any bio-solids hauling since the last commission meeting.

Maintenance Update

Biostyr Blower – Recently had a fail on biostyr blower #4. The cost of new is \$9,015.00. An exchange unit is \$6760.00. If the unit can be repaired it will be a standard overhaul cost at \$4,280.00. The cost of the exchange blower will not exceed the \$6760.00.

Peak Flow Pump #4 Shaft – Pump shaft has been received and pump is in process of being repaired.

Main Entrance Gate – The gate is fixed and operational.

Laser Flow System Meters – The laser flow meters have been received and have been installed; scheduling with Mulcahy Shaw to come in and set up the meters.

HOV Agricultural Land (Grass Buffers) – The three rock equipment crossings and cleanup of the grass buffer zone was to start the week of August 26th, however, due to rain it has been delayed.
