

Operations Update

Plant Operations – Plant operations and treatment were good during the month of June.

Bio-Solids Hauling – United Liquid Waste started hauling bio-solids on July 6th. If the weather remains dry they'll continue hauling until the tanks are empty. Anticipate completion by July 17th.

Maintenance Update

ATAD Digester – After bio-solids storage tanks are emptied the plant will be taking the ATAD digester down for cleaning.

PLC Upgrades at Meter Stations – Upgrades to the PLC and SCADA system is scheduled for the first part of August.

Biostyr Blower – The blower's projected delivery is the beginning of July. Has been shipped; waiting to hear from shipping company.

Final Effluent Reuse Pump – The new reuse pump has been ordered.

HOV Agricultural Land (Grass Buffers) – No update.
