

Project Update: Interceptor System Rehabilitation

OVERVIEW

The 5.5-mile system, originally installed in 1977, has experienced corrosion of the concrete pipe and structures (manholes and metering stations). The interceptor system rehabilitation involves installing a liner inside the pipe. The liner is resistant to acid, which caused the corrosion.

WORK COMPLETED TO DATE

2021

- Project initiated following video inspection results
- Pre-design work and project review completed for design of improvements

2022

- Applications for permits from eight related agencies submitted
- Coordinated with community stakeholders
- Developed memorandums of understanding with member communities
- Prepared and reviewed bidding documents

WORK UNDERWAY OR TO BE COMPLETED

2023

- Public bidding process begins with contractor prequalifications and pre-bid contractor conference
- Opening and reviewing of contractor bids including proposed contractor schedules
- Award of contract and coordination with contractor
- Community outreach continues

2024

- Community outreach related to work
- Contractor begins work (concludes with end of construction season)

2025

- Interceptor system rehabilitation is complete

Do you have comments or feedback regarding the interceptor system rehabilitation?

Please share your feedback at interceptor.feedback@HVMSD.org.

*Please note, the project timelines are subject to changed based on weather-related delays or other unforeseen circumstances.

The Heart of the Valley Metropolitan Sewerage District was established in 1974 to provide cost-effective wastewater collection and treatment for its member communities while protecting public health, safety and the quality of the environment. Member communities include the city of Kaukauna, the villages of Little Chute, Kimberly and Combined Locks, and the Darboy Sanitary District.
