

Old and New Business 10-13-26

- **9/15/26 Rain event** – had a significant rain event dropping an inch and half of rain which luckily did not come all at once as a downpour. Events of similar magnitude have necessitated blending events in the past, but this time influent flows maxed out around 20 MGD and then tapered back.
- **9/16/26 Safety luncheon** - HOV staff luncheon. A luncheon is scheduled for each 6 months when attention to detail and safe work practices result in zero work accidents during the prior 6-month period.
- **9/21/26 Filter Site Visit** - The District hosted staff from both New London and Brookfield WWTF to observe and see the District's tertiary filter installation and the first of its kind automated filter cleaning system. The City of New London is in the planning stages for a new treatment facility while Brookfield is looking at the cost /benefit of adding the automated cleaning system to its existing Kruger disk filter operation. The water chemistry and filter conditions at Brookfield require frequent chemical cleaning that requires a large demand of staff time.
- **2026 Land application** – Badger has emptied both tanks and hauling for 2026 is complete.
- **Organization and Succession Plan** – not yet ready for review. Took a back seat this month to other priorities. Timeframe is to get completed by the year end.

Key Dates / Meetings

- Annual WWOA conference 10/14 & 10/15
- Brian vacation 11/2-11/6
